OVERLAND STOCK WIRE.

Supposed Rental to One Chicago House Is \$54,000-Cable Arbitrage Büsiness.

A large Chinese grain and stock brokerage firm has leased a private telegraph wire from Chicago to San Francisco, says the Inter Ocean. The firm already had a private wire from this city to New York, so that it now controls for its own exclusive use a wire service of 3,000 miles from ocean sopy to to ocean. Some idea of the profits that such a firm must obtain by means of their private-wire service may be gained by the fact that the 1,000-mile section of wire from this city to New York costs \$18,000 annually, which would indicate a total for the entire 3,000 miles of about \$54,000. Another form of wire service that yields large revenue to the ocean cable companies is that which is associated with the arbitrage trading, based upon simultaneous varying quotations for the same stocks in this city and New York and London. The average time for the round trip, or for an arbitrage order to London and the answer telling of its execution in the Song, "Three Cheers for Our Own market there, is between four and onehalf and five minutes. There have been messages sent under exceptional conditions in the record time of three and one-half minutes.
